VLAN-toolbox series

2U User Interface for a Switch

The **SRS Lighting VLAN-toolbox** is a user interface for a switch; very explicitly intended to significantly simplify and speed up controlling the switch.

Features:

- Simple way to physically separate data streams within a switch for improved performance in terms of data speed and clearer organization in the form of VLANs.
- Simple, reliable way to apply trunking for data transport between switches.
- Simple, reliable way to apply link aggregation (linked ports) for high data speeds and/or redundancy.
- No in-depth knowledge of data networks and IT in general required.
- Prevents incorrect settings that can lead to blocked access to the switch's controls.
- Standalone use; no laptop or other external equipment required to make settings.
- Monitor for power consumption when applying Power over Ethernet (PoE)
- Monitor for port load
- Cable tester
